Only 16 more shopping days until Christmas. We'll have to hurry.

Mark Austin and Pres. H. S. Allen were the speakers at the Priesthood meeting on Sunday.

Mr. and Mrs. A. E. Hancock spent part of the week in Stirling with relatives and Anna on business.

Be sure and see "Africa Speaks" at the Capitol Theatre, one day only, Saturday, Dec. 13, from 1 p.m. on, a continuous showing.

Cons. Edis, A.P.P. of Magrath, and J. W. Low, Police Magistrate, Cardston, were here on official business Tuesday of this week.

Watch for an announcement of a Wheat Pool Meeting, which will be held here shortly, following the Convention in Calgary.

Mrs. P. F. Christensen of Stirling, returned home on Monday, after spending a week here visiting her son-in-law and daughter, Mr. and Mrs. A. E. Hancock.

At the civic nominations in Cardston on Monday, December 1st, C. W. Burt was made Mayor by acclamation. This will be his third term as the chief executive of the town.

Mr. Gen. J. S. Stewart is giving an illustrated lecture at the Town Hall Monday evening Dec. 8, on "How the Canadians captured Vimy Ridge." This will be an exclusive lecture for all the returned men of the district.

Mark Brimhall and family, who have been living in Provo, Utah, for the past seven years are back in Raymond again and will make their home here for the winter months at least. Mr. Brimhall expressed his delight at the new business blocks and dwellings erected, and other signs of growth and progress since his departure.

Send us your news items. Have you been away? Have you had company? Have you or your friends had a party? All these things as well as births, deaths, marriages, etc., make news that we always like to have. Our phone is 24.

You've read about them, now come and see the African natives in their jungle habitations, set upon by the beasts. "Africa Speaks" at the Capitol on Saturday, Dec. 13th, in a continuous showing from 1 p.m. on.

Priesthood Meeting and Board Meeting of all of the Auxiliaries of the Stake were held on Sunday last with good attendance in all divisions. The complete Stake Relief Society Board and some additions to the Stake Genealogical Committee were presented and sustained by the audience.

Mr. and Mrs. John S. Smith and W. H. Steed of Cardston were here Tuesday afternoon, to ascertain the prospects and feeling regarding the presentation of the great musical comedy "Once in a Great While" so successfully presented in Cardston last week-end. There was nothing definite when they left.

Africa Speaks

LIONS CONTINUED. MENACE TO AFRICAN. VELDT TRIBES

Lions are the most dangerous enemies that menace African natives. These beasts literally attack the tribesmen in their very villages that they may feast on the herds. Having had their fill of fresh meats, they make the place a rendezvous, and take up their abode there until their attention is attracted elsewhere. During his recent trek across equatorial Africa, Paul L. Hoefler, noted explorer, found that the natives revered the lion as much as they feared him. Hoefler made amazing motion picture records of his trip which, under the title of "Africa Speaks", is playing at the Capitol Theatre Dec. 13.

Strong Position Shown By Bank of Montreal In Its Annual Statement

GAINS REPORTED IN PRINCIPAL DEPARTMENTS IN LAST SIX MONTHS OF FISCAL YEAR

TOTAL ASSETS AT \$826,969,537 ARE UP FROM \$822,599,648 -- LIQUID ASSETS OF \$438,192,479 ARE EQUIVALENT TO 59.32 PER CENT OF LIABILITIES TO PUBLIC -- TOTAL DEPOSITS AT \$697,395,742 ARE UP FROM \$688,067,754.

Striking evidence of the soundness of underlying conditions in Canada is afforded by the strong statement of the Bank of Montreal for the fiscal year to October 31st. Owing to its importance, the statement of the premier bank is always looked for with a great deal of interest. Undoubtedly this will be more particularly the case, on account of the complicated economic conditions that have prevailed throughout the world.

On this account there will be special satisfaction that the Bank has been able to maintain its usual strong position. As was to be expected, under the conditions, the total volume of business is down from the previous year. On the other hand, there has been a gain in several of the principal departments during the past six months. This would seem to indicate more favorable conditions and will be regarded as reassuring to the business interests of the country. Of special import to the many shareholders will be a profit and loss statement showing that profits for the year have been ample not only to provide for the usual dividends and bonus, but also to allow of an appropriation of \$800,000 for premises and the carrying forward of a comfortable balance to profit and loss account.

Strong Position

The general statement of assets and liabilities is an unusually strong one. Total assets are reported at \$826,969,537, up from \$822,599,648 at the end of the first six months of the year. Of this total liquid assets amount to \$438,192,479, at which level they are equivalent to 59.32 per cent of total liabilities to the public, and compare with \$373,450,296. Included among them are cash and Dominion notes of \$100,047,419, or 13.51 per cent of total public liabilities.

Gain in High Grade Holdings

Due to the general market conditions, there has been a substantial reduction in call loans and marked gains in the holdings of Dominion and Provincial government securities and in Canadian municipal securities and British, foreign and colonial public securities. As a result, call loans in Canada are \$17,840,690, down from \$27,460,856, and call loans in Great Britain and the United States have declined to \$60,921,712 from \$68,028,615. At the same time, Dominion and Provincial government securities have increased to \$131,107,484 from \$96,937,964, and Canadian municipal securities and British, foreign and colonial public securities total \$46,427,441, as compared with \$21,830,527.

The somewhat smaller volume of business being done throughout the country is reflected by a reduction in current loans in Canada to \$290,872,428, from \$335,301,194, while current loans outside of Canada are \$42,547,341 as against \$43,188,318. Loans to cities, towns and municipalities stand at \$24,246,054 as compared with \$37,451,194.

A constructive feature is shown by the tendency of deposits to record increases. Total deposits now amount to \$697,395,742, up from \$688,067,754.

Profits Maintained

The profit and loss account shows profits of \$6,519,031 as compared with \$7,070,892, in the previous year. The profits added to the amount carried forward, made the total available for distribution \$7,254,612. This was allotted as follows: Dividends and bonus \$50,047,586; provision for taxes Dominion Government, \$459,979, and reservation for bank premises, \$800,000; leaving a balance to be carried forward of \$947,047, as against \$735,582 at the end of the previous fiscal year.

The Bank this year, in addition to issuing its statement in circular form to shareholders, is publishing a summary of the outstanding features of the report, in a form that will be readily understandable. This statement will be found in another column and is certain to be of great assistance to all who are endeavoring to obtain in brief form an easily understood outline of the position of the Bank.

The report of the directors will be submitted to shareholders at the annual meeting, to be held at the head office of the Bank on Monday next, December 1st.

C. C. Watson Transferred

It is with a mingled feeling of pleasure and regret that we chronicle the transfer of Mr. C. C. Watson, Manager of the Bank of Montreal from Raymond to Wetaskiwin Alberta, which town is situated about 40 miles south of Edmonton on the gravelled highway.

During Mr. Watson's stay here he has made for himself a wide circle of close friends because of his desire and ability to counsel and help people in their financial affairs. He has been sympathetic and kindly in all his transactions and will be missed by all. For the past year he has been Vice-President of the Board of Trade. He and his good wife have been good mixers and their departure will be keenly felt in the social circles of the town.

The Recorder, while regretting their departure compliments them in the premotion Mr. Watson has received

Four Alberta Kiddies Killed

EDMONTON FLIER SWERVES TO AVOID ONE GROUP AND CRASHES INTO GAS TANKS

Edmonton, Alta., Nov. 29—Out of a gallant attempt to save life, the lives of four Fort Chippewyan children were instantly snuffed out on Thursday afternoon when an airplane piloted by W. S. "Monkey" Sherlock, famous Commercial Airway flier, hurtled itself against a group of gasoline tanks laid along the bank of Lake Athabasca for re-fueling purposes.

Word of the accident was received by radio Friday night. Sherlock's message stated he had landed on the ice and noticed a group of children ahead of him. He attempted to avoid hitting them and swerved his machine into the gas tanks at the shore. Playing behind the tanks were seven or eight other children whom he did not see.

Four of them were killed, two seriously injured, and one slightly injured. The dead are, Tommy Woodman, age 6; Danny Woodman, 9; Freddie McDonald, 6; Willard Bird 11.

Badly injured: Dorothy Woodman, 11; Dickie Woodman, 4; Arthur McDonald, 7.

Slightly injured: Bud Fraser.

Pilot Sherlock and his passengers, Right Rev. Bishop Freyre of Fort Smith, and the mother provincial of the northern missions, escaped unhurt. The aeroplane, a Bellanca, is reported to be smashed beyond repair.

A coroner's jury after viewing the bodies, the scene of the tragedy and hearing evidence, absolved the pilot from any blame or carelessness in connection with the case.

and joins with their many friends in wishing them every success and happiness in their new home.

Mr. Barum is temporarily in charge of the Bank here until a successor to Mr. Watson is chosen and can arrive to take charge.

A.C. Wins At Toronto

More fame was accorded the Raymond School of Agriculture when they were awarded second place for their earload of Hereford steers in the Royal Winter Show at Toronto.

This is a distinct compliment to the school under the direction of Principal Longman and Charles Asplund, who were in charge of the feeding.

The local winners were fed on feed produced locally consisting of alfalfa, pulp, beetlases, chop barley and chopped oats, etc.

The school has purchased about 20 head which have been put on feed here. This bunch consists of 10 Shorthorn heifers and an equal number of Angus.

Herman Trelle, Wembley, is the Wheat King of the World, as a result of his winnings at Chicago this week.

Don't forget the Supper, Program and Dance at the Opera House tonight (Friday) and Saturday. You all ought to be there.

Mrs. S. B. Card was hostess to the Athenian Club at a delightful arranged luncheon on Wednesday. Everlasting flowers and baby breath lent a pretty effect to the tables at which the guests were seated. Those present were: Mesdames E. Witbeck, C. Nilsson, A. W. Kirkham, Wm. Meeks, M. Kinsey, Ed. Nilsson, M. Buckholt, W. B. Nalder, R. Kinsey, Ted Gray, H. M. Holmes, H. Nalder, & C. W. Lamb.

INTERESTING LINKS

Then His Royal Highness, The Prince of Wales, who later became King Edward VII of England, visited Canada in 186, one of the most charming hostesses who entertained in his honor, was Mrs. Cauchon, wife of the Hon. Joseph Cauchon at that time Minister of the Crown. If we will but

think a moment, we can easily picture that dinner party, in those days when entertaining was the most lavish affair, in the grand old city of Quebec, and with the most beautiful woman in Canada as hostess.

In the Dominion Archives at Ottawa, on a long case in the public room is the bust of this woman, considered the most beautiful of her day, carved in parian marble by Marshal Wood, the famous English sculptor, who, also carved the figure of Queen Victoria which stands in the library of the House of Commons at Ottawa. At present there is no plate to tell who this bust represents, and a great deal of confusion has been caused. The figure is so beautiful that it is often mistaken for Princess Louise, and it is also so regal that it is claimed by many to be Queen Victoria. This, however, will be remedied in the near future, for a brass plate is being prepared for it by the lady's only son, Mr. Noulan Cauchon, who has lent this piece of art to the Archives.

Mrs. Cauchon was Maria Louise Noulan, of Sillery parish, and by her marriage to Joseph Cauchon of Chateaufort, connected two very old and famous families. For some years she lived in Quebec city where she had a beautiful home. Later they moved to Ottawa where Mr. Cauchon occupied several important governmental positions, among them being the Speaker of the Senate, the first after confederation. In Ottawa Mrs. Cauchon became noted for her grace as hostess, and her beautiful home on Laurier Avenue, which she named Stadacona Hall after the old name of Quebec City, is still one of the most beautiful homes in the Capital City.

Mrs. Cauchon died at the age of eighty six after she had lived for several years in Manitoba where her husband was the Lieutenant Governor. Her death occurred in 1877, while she was still in the prime of youth, but her name will go down in history as one of Canada's most famous hostesses.

Today was initiation day at the A.C. Usual tactics were practiced.

The Prince of Wales received Hon. R.B. Bennett, Canadian Premier, Tuesday night and the Premier left for home Thursday of this week.

Represent West at Royal Winter Fair

Swine Club Judging Champions, representing the Western Provinces, made a clean sweep of the judging contests at the Royal Winter Fair, held recently at Toronto. The photograph shows the winners of the four western provincial titles and the winners of the Dominion Championship in Swine and Calf Judging. The teams from Alberta were successful in defeating teams from all other provinces of the Dominion in Calf and Swine Club work and also captured the coveted Robb Trophy for Swine Club Judging and the W. J. Black Trophy for Calf Club Work. From left to right the photograph shows: Top row: H.

MATERNAL MORTALITY

The death of a mother is the greatest tragedy that can occur. The loss of the mother brings in its train so many social ills, that it is beyond our ability to put its far-reaching results into words.

Unfortunately, such tragedies are not uncommon. In this country, six mothers lose their lives for every thousand children born alive. The appalling thing about these deaths is that many of them need not occur as it is possible to prevent them.

To the woman herself and to her family, it may appear as if she had been struck down by a bolt from the blue. What has actually happened is that a condition develops, but goes unnoticed until serious symptoms manifest themselves.

When the expectant mother is under the regular supervision of her doctor, he can detect any abnormal condition from the start, and he can by proper treatment, prevent the development of any serious condition.

This is one reason—and it should be a sufficient one—why every expectant mother should have prenatal care. By prenatal care, we mean that, thru out her pregnancy, from the earliest months, she should see her doctor at regular intervals, once a month, at first, and twice a month during the latter part of pregnancy.

Prenatal care is preventive care. It shows us we have pointed out, for

the early discovery and proper treatment for abnormal conditions. It also makes for a more comfortable pregnancy if the woman follows the advice which the doctor gives her.

Women are often told that the process of childbirth is a normal function, and that they should not consider themselves as being anything but normal during that period. This is all true, but it does not follow that in the performance of a normal body function, medical help and guidance are not needed.

Eating is a normal process which we carry through several times a day and yet we know that most people need to be helped by following some intelligent direction as to the selection of their foods. Digestion is a normal function of the body which usually goes on without our being aware that it is taking place, yet, once in a while, the digestive process gets out of order, and then we need medical help.

We would say to expectant mothers that it is quite right for them to consider their condition as being normal, but that they should not forget that what they want to do is to keep normal. The best way to maintain the normal condition and to prevent any serious abnormality is through the prenatal care which the family doctor gives.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

ARE WE THANKFUL?

Every little while we read of people returning from almost every part of North America, some even from Europe, and it seems that before they have talked very long they come out with expressions equivalent to this "And people here are surely a great deal better off than they are where I have been." If only one said this of some one district, we may be correct in thinking we were about on our last legs, but when everyone who returns tells virtually the same story then we come to believe that "this is the place" and no mistake.

There is no question but that we are going through a perilous time. A time when we must economize and plan to carry on in a contracted manner of spending for some time. This condition however need not draw down the corners of our mouth, spoil our digestion and make us unhappy and down. It doesn't cost anything to smile, laugh, sing and really get enjoyment out of life, and if we will think of the \$3.00 that we have instead of the \$1.00 that we haven't and would like to have, we would find a great deal more enjoyment in life.

Christmas is near at hand, the time when we commemorate the glorious resurrection of our Lord and Redeemer, the event in world history which makes life worth the living, and the sorrow and disappointment of life sweet afterwards, because of greater vision and understanding.

Let us not dwarf the spirit of giving this year. Our remembrances may not be so luxurious nor as varied, but we can have the same sweet spirit of giving, which after all is the barometer, of the real value of gifts.

That "It is more blessed to give than to receive" is still a truth that makes us all better.

SUNSHINE NEED AIDS IN RELIEVING DISTRESS

An organization which is working twelve months in the year and particularly during the cold weather months to help those in distress is the Calgary Herald Sunshine Santa Claus Fund. Every year at this time an appeal is made to contribute to the fund and assistance is sought, not only in the City of Calgary, but throughout the province for the reason that the Sunshine Society helps to relieve suffering in various parts of Alberta, as well as in the City of Calgary. Sunshine has been functioning for eight years and in that period has relieved the distress of thousands.

It is a good thing for Alberta that such an organization exists because there are many cases which cannot be assisted through official sources and yet, if the cases are not helped, the suffering would be intense.

Those who are in the happy position where their lives are comfortable are invited to consider the plight of those who lack the common necessities of life and are invited to show their warm heartedness through the medium of contributions to the Sunshine Society.

MAKE YOUR FEEDING OPERATIONS EFFECTIVE TO INCREASE RETURNS

Cattle feeders during the coming season have an ideal condition in that the prices of cattle and feed are low; market, the prices will also be out that when the cattle are ready for market, the prices will also be low, in fact there is nothing that anybody has to sell just now that appears to be worth very much, as the man who has to do the eventual buying over the counter is short of change.

Nevertheless it is a certainty with cattle as with everything else, that the man who has the best article to offer will get the most money, the buyers at the feeder sales and the stockyards, or from among their own neighbors, and the boys and girls who are planning to enter future feeding competitions, should find something in the following suggestions which are put forward by the Montana State college, which may also help some of the people on this side of the line to bring along their cattle:

"It is generally recognized that, after selection, feeding is the biggest factor in profitable baby beef production. Not only should the calf increase both in size and weight but also he should make marked improvement in

order that he may meet the approval of the packer, at the close of the feeding period. Such being the case, rations should be compounded which will provide an excess of nutrients for fattening rather than for growing. Judges at both state and interstate fairs have stated that the 'overdone' calves are very few and far between. 'Don't get the mistaken idea that the calf has to be "grown out" before he's fattened. Calves has a tendency to grow out too much even while being fed a fattening ration,' says one authority.

"Many raisers have adopted a consistent feeding system which has been proved to be very successful in Montana. If the calves have been running on pasture it has been found that it is not a good practice to put them in a stall when one begins feeding. It is much better to let him have some range and not run the risk of 'setting his hair' as the old feeders put it. After a month of this sort of management the calf can be put in a lot and later in stall with range in a small lot.

"The following feeding rules have been adopted as the best method. The first rule is of prime importance, although all of them are very important and are followed by successful feeders:

1. Have regular feeding hours and don't vary them.
2. Feed no more than your calves will clean up.
3. Increase your feed gradually.
4. Make a change of feed slowly.
5. Allow a variety of feeds. Feed a concentrate.
6. Keep your feed trough clean. Give left-over feed to other stock.
7. Give the calves plenty of salt.
8. Allow your calves all the water they will drink.
9. When feeding three times a day skip Sunday noons.
10. Pasture never fattened or helped to fatten a baby beef calf.

"Among the leading concentrates successful feeders this year are advised to feed a wheat bran ration which runs from 12 to 13 per cent protein, and while exceptionally low in price it is a mighty good feed to add to the ration. It is high in protein, rather bulky, and being of a laxative nature keeps the animal's system cooled out, the coat in good shape. It is widely used by showmen and is deserving of more popularity than it at present enjoys from calf club members."—Market Examiner.

FIRST MANUFACTURING IN CANADA 325 YEARS AGO WAS FLOUR MILLING

Ottawa, Dec 3: (Special to the Recorder) Manufacturing in Canada on anything like a large scale did not really begin until about the time of the grandfathers of the present period although for some generations previously there had been wayside blacksmiths and woodturners, tailors, criers and gun smiths.

The type of manufacturers first to appear in the new country always depended upon the raw materials at hand or manufacturing at first is engaged solely to supply articles commonly needed and too bulky to be easily imported. Later manufacturing is engaged in for another and by this time more important reason, the growth of population, by natural increase and immigration, which makes it necessary to provide avenues of employment. These principles have been borne out in Canada's manufacturing history.

In 1605 the first manufacturing by Europeans in Canada took place and the circumstance was prophetic of the later development of the country. At Port Royal N. S. in that year a crop threshed by the primitive method of the time, was ground into flour. Thus 325 years ago the interdependence of the farmer and the manufacturer was demonstrated.

The early settlers were concerned primarily with the necessity of providing themselves with food, fuel, shelter, clothing and protection from the savage inhabitants of the country. They could grow food on their own land as they cleared away the forest timbers which they used to supply shelter and fuel.

"When Canada was new France only one expedition a year arrived from Old France and to eke out the supplies of clothing the settlers made clothing from furs and buckskin. Had it not been for the resourcefulness of the colonists in the year 1705 there would have been a tragedy. In that year the English captured the yearly convoy and no supplies arrived so the settlers were forced to replenish their wardrobes themselves. As a result of this drastic object lesson sheep were imported and the production of homespun woollens had its start. Each year brought more immigrants who settled as close to each other as possible and community life was started. Then the colonists began to barter their profits for

Lee Brewerton was a Lethbridge visitor on Tuesday of this week.

Wired Conference convened in the Raymond Second Ward on Sunday evening with a large audience present and good reports being made by all the auxiliary officers in reporting conditions in the ward.

This week has been about one of the nicest weeks for this time of the year that one could ask for.

Mark Brimhall and Alvin Bullock were the speakers at the First Ward Sacrament meeting on Sunday evening when a large audience was present.

Edith Domey of Taber, was instantly killed Thursday afternoon of last week when a roof cave-in caught him without warning in a strip coal mine he was working in. Death was almost instantaneous.

Notes from the A.C.

The opening dance of the School of Agriculture took place on Friday evening, November 28th. Although there was not as large a crowd as anticipated, the Assembly Hall was well filled. After a refreshing lunch dancing was resumed until 12 o'clock which came all too soon for the merry makers.

The enrolment numbers 78 students.

A Twin City Tractor was brought over from Magrath by Mr. Acheson on Saturday last.

The Second Year Girls are busily engaged in Meal Serving these days. One ten, three lunches, one semi formal dinner and one formal dinner being served by each of the girls. The girls are doing very well and it is indeed a treat to be their guest.

A theatre party for the students is being planned for Friday night Dec. 5th.

On Saturday night, Nov. 29, it being the thirteenth wedding anniversary of Mr. and Mrs. O. S. Longman, the staff paid them a very unexpected visit. A mock wedding was staged. Mr. Acheson, clad in white with wedding veil, made a healthy looking bride, while Mr. Asplund, resplendent in dress coat, tweed trousers and straw hat was certainly the bashful bridegroom. Mr. Gilbert, with cloak and gown, red-nosed, 'be-medaled', did solemnly impress upon the young couple the dangerous step they were about to take. To the strains of the "Wedding of the Painted Doll" played by Mrs. Gilbert, in an old fashioned gown, the bridal party filed into the living room.

The bride's mother and father were there, ably impersonated by Miss Davidson and Mr. Walker. The mother cried copiously on the fathers shoulder as the final solemn pronouncement was made by the officiating clergyman. Bridesmaids and flower girls included Mrs. Walker, Miss Ritis, Miss Peterson and Mrs. Asplund, all clad in the garb of bygone days.

Following the wedding ceremony the staff presented a gift of china to Mr. and Mrs. Longman. The rest of the evening was spent in playing games.

Proving the truth of an old saw:—Room and board—For Two, \$9.00; one \$10.00.—Dearborn Press.

Atchew Socialist:—"After all, what is the difference between a rich man and a poor man?"

Bystander: "A rich man has acute laryngitis and a poor man has a cold."—Penn Punch Bowl.

BANK OF MONTREAL

Established 1817

A presentation, in easily understandable form,
of the Bank's

ANNUAL STATEMENT

31st October, 1930

LIABILITIES

LIABILITIES TO THE PUBLIC

Deposits	\$697,395,742.34
Payable on demand and after notice.	
Notes of the Bank in Circulation	39,724,450.50
Payable on demand.

Financial responsibilities undertaken on behalf of customers for commercial transactions (see offsetting amount in "Resources").	
Other Liabilities	4,357,780.52
Items which do not come under the foregoing headings.	
Total Liabilities to the Public	\$750,211,837.16

LIABILITIES TO THE SHAREHOLDERS

Capital, Surplus and Undivided Profits	
& Reserves for Dividends	76,757,700.45
This amount represents the shareholders' interest in the Bank, over which liabilities to the public take precedence.	
Total Liabilities	\$826,969,537.61

RESOURCES

To meet the foregoing Liabilities the Bank has

Cash in its Vaults and in the Central Gold Reserves	\$100,047,419.79
Notes of and Cheques on Other Banks	41,624,155.54
Payable in cash on presentation.	
Money on Deposit with Other Banks	35,118,848.74
Available on demand.	
Government & Other Bonds and Debentures	181,592,610.56
Guaranteed Securities practically all of which mature at early dates.	
Stocks	1,037,042.59
Railway and Industrial and other stocks at or below market value.	
Call Loans outside of Canada	60,921,712.69
Secured by bonds, stocks and other negotiable securities of greater value than the loans and representing money quickly available with no disturbing effect on conditions in Canada.	
Call Loans in Canada	17,840,690.03
Payable on demand and secured by bonds and stocks of greater value than the loans.	

TOTAL OF QUICKLY AVAILABLE RESOURCES \$438,192,479.94
(equal to 59.32% of all Liabilities to the Public)

Other Loans	359,703,279.55
To manufacturers, farmers, merchants and others, on conditions consistent with sound banking.	

Bank Premises 14,500,000.00

Three properties only are carried in the names of holding companies; the stock and bonds of these companies are entirely owned by the Bank and appear on the books at \$1.00 in each case. All other of the Bank's premises, the value of which largely exceeds \$14,500,000, appear under this heading.

Real Estate and Mortgages on Real Estate 1,803,352.09

Acquired in the course of the Bank's business and in process of being realized upon.

x Customers' Liability under Letters of Credit 8,723,863.80

Represents liabilities of customers on account of Letters of Credit issued by the Bank for their account.

Other Assets not included in the foregoing 4,046,562.43

Making Total Assets of \$826,969,537.61

to meet payment of Liabilities to the Public of 750,211,837.16

leaving an excess of Assets over Liabilities to the Public of \$ 76,757,700.45

THE DAIRY COW MAKES WORK

In these days when jobs are at a premium the good old dairy cow is helping out in a wonderful manner. Bought today, she starts making work and income tomorrow.

We know a big wheat farmer who is milking 22 head of dual purpose dairy cows this winter. He had lots of corn and sunflower silage in a trench silo, plenty of hay and lots of coarse grain. His herd is handled with the idea of supplying winter work for his men as well as a winter income. The cows come fresh in the late fall, are milked through until harvest time, and then dried off for a couple of months before they are due to freshen. In this way he has balanced up his farming operations, is able to handle a good bunch of hogs using the skim milk, has some steers to fatten each winter on grass in the

summer, and altogether he adds a good many thousand dollars to the farm income as a result of the dairy herd. It isn't a record making herd, but the dual purpose cows are selected a pure bred sire is kept, the best of the helpers kept for the milking herd, and the herd is well fed so that they can produce during the winter months.

How much better off this farmer is today than if, with his grain all in the elevator and nothing to do during the winter to bring in an income he just sat around and cursed the government and the millers and implement makers and those who, he is sure, are robbing him.

"Pulling teats" used to be disdained. There are 800 men walking the streets looking for something to do in Lethbridge alone. In the whole of Alberta there are 3,000. The dairy industry, if properly developed in this

province could give a job this winter to every unemployed man. Alberta might just as well be exporting butter as importing it, because we can raise feed in abundance. And if we were on an exporting basis the year round we would have a lot more contentment and a more sizeable income.—Lethbridge Herald.

MARRIED

Miss Ruth Meldrum, daughter of Mr and Mrs. David Meldrum and Paul T. ylor of Magrath were married Wednesday Dec. 3rd at the Cardston Temple.

Miss Meldrum is one of Raymond's most popular young ladies and Mr. Taylor is one of Magrath's fine young men. The best wishes of the community are extended them for their future happiness. They will make their home in Magrath.

Here and There

(619)
Western Canadian cattle almost swept the boards in 16 classes at the Washington State Fair just concluded at Yakima, Wash., when the Holstein show herd owned by the Canadian Pacific Railway Supply Farm at Strathmore, Alberta, won fourteen first prizes and nine seconds, also taking senior, junior and grand championships in both male and female classes.

A 35 1/2-lb. muskallonge, largest to be taken from the waters of the French River this year, was caught a few days ago by E. R. Spottes, a visitor from Houston, Texas, and was entered in the annual competition for the French River Bungalow Camp Trophy. The monster was landed after a thrilling fight that lasted forty minutes during which it broke water a number of times. When netted it was found to measure 49 1/2 inches in length and 25 inches in girth. A little later the same fisherman caught an 18-pound musky.

Modern developments in railroad traffic leading to heavier trains and increased speed is bringing about a concentrated study of the rail weights, according to Grant Hall, senior vice-president of the Canadian Pacific Railway, interviewed recently. The railway, he stated, has used 100-lb. rails since 1921 and has more than 4,000 miles of this weight of steel, particularly in the heavy travel districts between the larger cities and the Rockies, but the heavier trains made possible by greatly increased engine power have combined to bring up the question of 130-lb. rails which is now being studied and on which a final decision will soon be reached.

The history of the folk song in Canada will be illustrated at the Quebec Festival of French-Canadian Folk-Song and Handicrafts which will be held October 16-18 next with headquarters at the Chateau Frontenac. The Canadian Pacific Railway has again planned a comprehensive series of evening concerts of folk-songs, folk-music, dances, choral arrangements and children's play parties and dances.

The National Dairy Council of Canada in a recent report stated that Saskatchewan stood third in the Dominion in the matter of estimated gross revenue from dairy products in 1929. The figures are given at \$21,000,000 as compared with \$20,979,000 the previous year.

Total production of maple syrup in Canada for 1930 was 2,185,379 gallons valued at \$3,869,107, and of maple sugar 8,208,276 pounds, valued at \$1,381,514. Average market price of maple syrup was \$1.77 a gallon, and of maple sugar 17 cents a pound. The Province of Quebec was the largest producer and balancer, came from Ontario, Nova Scotia and New Brunswick.

Welling News

A program was held in Mr. Coleman's room Friday afternoon last. It was arranged and supervised by the High School committee. The Christmas program was discussed.

Male Chorus practices are held regularly every Thursday night at 8 p.m. under the direction of the Mutual the first one having been held at the home of Mr. and Mrs. Geo. Bullock when everyone enjoyed the evening. These practices are for all men of Mutual age and over. We extend a welcome to all to join.

Vivian Peterson has been ill for the past week, but is now back to his school work.

The Mutual held a very successful dance in the Church on Saturday night. Music was furnished by the Merymakers Orchestra of Raymond. Those who attended report a very enjoyable time.

Claude Peterson started working in the Sugar Factory Sunday night, and is under W. Bullock.

Miss Bernice Wilde, who has been ill in the Galt Hospital at Lethbridge for some time is now improving, but slowly, and she is not expected home for about three weeks.

IS HE DEAD?

Billy Brown had a new pair of skates for his birthday. With a wild whoop he rushed down to the river to try them out. Johnnie his chum, went with him, and Doris, his girl friend, tagged along too. They contented themselves by watching from the bank while Billy skated forwards and backwards, and round and round in circles.

They envied him as the shining steel cut the ice and sped him on ward. Suddenly there was a scream from the middle of the river. The ice had given way and Billy was in danger of his life. Doris tore off her scarf and tied it to Johnnie's sweater sleeve. They managed to throw it far out and he caught hold. He clung on for dear life and the seconds seemed like years.

Thank God, the teacher was passing and he came speedily to the rescue. Billy had lost hold of the life line and it looked as if he were drowning. "Is he dead?" sobbed Doris. The teacher did not answer, he was too busy with artificial respiration, trying to restore life at all costs.

Billy recovered and thanked Teacher for saving his life.

The next Junior Red Cross program included a special lesson on First Aid and there as no one more attentive than Billy. You may read the same booklet the teacher used if you will apply to The Red Cross Society, 407 Civic Block, Edmonton, for a free copy.

PARLIAMENT WILL NOT MEET UNTIL EARLY IN MARCH

Ottawa, Dec. 4, (Special to the Recorder).—While official announcement will not be made until within a month of the event, it is not the intention of the Bennett Government to call parliament together until approximately March 1st.

The decision is, of course, subject to amendment but the reasons which have led to it will hardly be met.

They are, firstly that the delay will permit the Government to complete its entire tariff revision and to have its budget ready for submission as soon as the debate on the address from the Throne is concluded. Secondly, that by meeting in January the House will only all two additional months of debate to Hansard.

While the House is in session departmental business necessarily languishes as Ministers are otherwise engaged. A January to June session, followed by the holiday months of July and August, would knock eight months

out of the departmental year, or at least hamper administration for that length of time.

All the general argument on tariff revision might be concluded in two weeks but it is a matter of record that on a major tariff revision every item will see reiteration of the argument until hot weather drives the membership home. Next year, whether the House assembles in January or March, it will talk until July hence the viewpoint that two months can be saved for departmental work if the session is called in March.
